</thead>
<tbody>
<tr>
<td>!</td>
<td>Be sure not to do.</td>
</tr>
<tr>
<td>🔴</td>
<td>Be sure to follow the instruction.</td>
</tr>
<tr>
<td>🔴</td>
<td>Never insert your finger or stick, etc.</td>
</tr>
<tr>
<td>🔴</td>
<td>Never step onto the indoor/outdoor unit and do not put anything on them.</td>
</tr>
<tr>
<td>🔴</td>
<td>Danger of electric shock. Be careful.</td>
</tr>
<tr>
<td>🔴</td>
<td>Be sure to disconnect the power supply plug from the power outlet.</td>
</tr>
<tr>
<td>🔴</td>
<td>Be sure to shut off the power.</td>
</tr>
<tr>
<td>🔴</td>
<td>Risk of fire.</td>
</tr>
</tbody>
</table>

### WARNING

- Do not connect the power cord to an intermediate point, use an extension cord, or connect multiple devices to a single AC outlet.
  - This may cause overheating, fire, or electric shock.
- Make sure the power plug is free of dirt and insert it securely into the outlet.
  - A dirty plug may cause fire or electric shock.
- Do not bundle, pull, damage, or modify the power cord, and do not apply heat or place heavy objects on it.
  - This may cause fire or electric shock.
- Do not turn the breaker OFF/ON or disconnect/connect the power plug during operation.
  - This may create sparks, which can cause fire.
  - After the indoor unit is switched OFF with the remote controller, make sure to turn the breaker OFF or disconnect the power plug.
- Do not expose your body directly to cool air for a prolonged length of time.
  - This could be detrimental to your health.
- The unit should not be installed, relocated, disassembled, altered, or repaired by the user.
  - An improperly handled air conditioner may cause fire, electric shock, injury, or water leakage, etc. Consult your dealer.
  - If the power supply cord is damaged, it must be replaced by the manufacturer or its service agent in order to avoid a hazard.

When installing, relocating, or servicing the unit, make sure that no substance other than the specified refrigerant (R32) enters the refrigerant circuit.
- Any presence of foreign substance such as air can cause abnormal pressure rise and may result in explosion or injury.
- The use of any refrigerant other than that specified for the system will cause mechanical failure, system malfunction, or unit break-down. In the worst case, this could lead to a serious impediment to securing product safety.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- Children should be supervised to ensure that they do not play with the appliance.
- Do not insert your finger, a stick, or other objects into the air inlet or outlet.
  - This may cause injury, since the fan inside rotates at high speeds during operation.
- In case of an abnormal condition (such as a burning smell), stop the air conditioner and disconnect the power plug or turn the breaker OFF.
  - A continued operation in the abnormal state may cause a malfunction, fire, or electric shock. In this case, consult your dealer.
SAFETY PRECAUTIONS

**WARNING**

When the air conditioner does not cool or heat, there is a possibility of refrigerant leakage. If any refrigerant leakage is found, stop operations and ventilate the room well and consult your dealer immediately. If a repair involves recharging the unit with refrigerant, ask the service technician for details.

- The refrigerant used in the air conditioner is not harmful. Normally, it does not leak. However, if refrigerant leaks and comes in contact with fire or heating part of such a fan heater, kerosene heater, or cooking stove, it will create harmful gas and there is risk of fire.

The user should never attempt to wash the inside of the indoor unit. Should the inside of the unit require cleaning, contact your dealer.

- Unsuitable detergent may cause damage to plastic material inside the unit, which may result in water leakage. Should detergent come in contact with electrical parts or the motor, it will result in a malfunction, smoke, or fire.

- The appliance shall be stored in a room without continuously operating ignition sources (for example: open flames, an operating gas appliance or an operating electric heater).

- Be aware that refrigerants may not contain an odour.

- Do not use means to accelerate the defrosting process or to clean the appliance, other than those recommended by the manufacturer.

- Do not pierce or burn.

This unit should be installed in rooms which exceed the floor space specified below.

- GLS0 : 2.2 m² or larger
- GL60 : 2.3 m² or larger
- GL70 : 3.1 m² or larger

**CAUTION**

Do not touch the air inlet or the aluminum fins of the indoor/outdoor unit.

- This may cause injury.

Do not use insecticides or flammable sprays on the unit.

- This may cause a fire or deformation of the unit.

Do not expose pets or houseplants to direct airflow.

- This may cause injury to the pets or plants.

Do not place other electric appliances or furniture under the indoor/outdoor unit.

- Water may drip down from the unit, which may cause damage or malfunction.

Do not leave the unit on a damaged installation stand.

- The unit may fall and cause injury.

Do not step on an unstable bench to operate or clean the unit.

- This may cause injury if you fall down.

Do not pull the power cord.

- This may cause a portion of the core wire to break, which may cause overheating or fire.

Do not charge or disassemble the batteries, and do not throw them into a fire.

- This may cause the batteries to leak, or cause a fire or explosion.

Do not operate the unit for more than 4 hours at high humidity (80% RH or more) and/or with windows or outside door left open.

- This may cause the water condensation in the air conditioner, which may drip down, wetting or damaging the furniture.

- The water condensation in the air conditioner may contribute to growth of fungi, such as mold.

Do not use the unit for special purposes, such as storing food, raising animals, growing plants, or preserving precision devices or art objects.

- This may cause deterioration of quality, or harm to animals and plants.

Do not expose combustion appliances to direct airflow.

- This may cause incomplete combustion.

Never put batteries in your mouth for any reason to avoid accidental ingestion.

- Battery ingestion may cause choking and/or poisoning.

Before cleaning the unit, switch it OFF and disconnect the power plug or turn the breaker OFF.

- This may cause injury, since the fan inside rotates at high speeds during operation.

When the unit will be unused for a long time, disconnect the power plug or turn the breaker OFF.

- The unit may accumulate dirt, which may cause overheating or fire.

**IMPORTANT**

Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold. It is therefore recommended to clean air filters every 2 weeks.

**FOR INSTALLATION**

**WARNING**

Consult your dealer for installing the air conditioner.

- It should not be installed by the user since installation requires specialized knowledge and skills. An improperly installed air conditioner may cause water leakage, fire, or electric shock.

Provide a dedicated power supply for the air conditioner.

- A non-dedicated power supply may cause overheating or fire.

Do not install the unit where flammable gas could leak.

- If gas leaks and accumulates around the outdoor unit, it may cause an explosion.

**CAUTION**

Install an earth leakage breaker depending on the installation location of the air conditioner (such as highly humid areas).

- If an earth leakage breaker is not installed, it may cause electric shock.

Ensure that the drain water is properly drained.

- If the drain passage is improper, water may drip down from the indoor unit, wetting and damaging the furniture.

In case of an abnormal condition

Immediately stop operating the air conditioner and consult your dealer.
**OPERATING INSTRUCTIONS**

**NAME OF EACH PART**

**Indoor unit**

<GL25/35/42/50/60>

- Front panel
- Air filter
- Air cleaning filter (Anti-Allergy Enzyme Filter)
- Air outlet
- Fan guard
- Horizontal vane
- Vertical vane

**Remote controller**

- Signal transmitting section
- Distance of signal: About 6 m
- Beep(s) is (are) heard from the indoor unit when the signal is received.
- Battery replacement indicator
- OFF/ON (stop/operate) button
- LONG button (GL71/80 only)
- WIDE VANE control button (GL71/80 only)
- FAN speed control button
- WEEKLY TIMER set buttons
- TIME, TIMER set buttons
- TIME, TIMER set buttons
- i-save button
- ECONO COOL button
- POWERFUL button (GL71/80 only)
- VANE control button
- Battery replacement indicator
- Display section
- Operation display section
- Remote control receiving section
- Operation indicator lamp
- Emergency operation switch

**Outdoor unit**

- Air inlet (back and side)
- Refrigerant piping
- Drainage hose
- Air outlet
- Drain outlet

Outdoor units may be different in appearance.

En-3

**Remote controller holder**

- Slide the lid down to open the remote controller. Slide it down further to get to the weekly timer buttons.

Only use the remote controller provided with the unit.
Do not use other remote controllers.
If two or more indoor units are installed in proximity to one another, an indoor unit that is not intended to be operated may respond to the remote controller.

En-3
PREPARATION BEFORE OPERATION

Before operation: Insert the power supply plug into the power outlet and/or turn the breaker on.

Installing the remote controller batteries

1. Remove the front lid.
2. Insert the negative pole of AAA alkaline batteries first.
3. Install the front lid.
4. Press RESET.

• Make sure the polarity of the batteries is correct.
• Do not use manganese batteries and leaking batteries. The remote controller could malfunction.
• Do not use rechargeable batteries.
• The battery replacement indicator lights up when the battery is running low. In 7 days after the indicator starts lights up, the remote controller stops working.
• Replace all batteries with new ones of the same type.
• Batteries can be used for approximately 1 year. However, batteries with expired shelf lives last shorter.
• Press RESET gently using a thin instrument. If the RESET button is not pressed, the remote controller may not operate correctly.

Setting current time

1. Press CLOCK.
2. Press either the TIME button or the TIMER buttons to set the time. Each press increases/decreases the time by 1 minute (10 minutes when pressed longer).
3. Press the DAY button to set the day.
4. Press CLOCK again.

• Press CLOCK gently using a thin instrument.
SELECTING OPERATION MODES

AUTO mode (Auto change over)
The unit selects the operation mode according to the difference between the room temperature and the set temperature. During AUTO mode, the unit changes mode (COOL↔HEAT) when the room temperature is 2°C away from the set temperature for more than 15 minutes.

Note:
Auto Mode is not recommended if this indoor unit is connected to a MXZ type outdoor unit. When several indoor units are operated simultaneously, the unit may not be able to switch operation mode between COOL and HEAT. In this case, the indoor unit becomes standby mode (Refer to table of Operation indicator lamp).

COOL mode
Enjoy cool air at your desired temperature.

Note:
Do not operate COOL mode at very low outside temperatures (less than -10°C). Water condensed in the unit may drip and wet or damage furni- ture, etc.

DRY mode
Dehumidify your room. The room may be cooled slightly. Temperature cannot be set during DRY mode.

HEAT mode
Enjoy warm air at your desired temperature.

FAN mode
Circulate the air in your room.

Note:
After COOL/DRY mode operation, it is recommended to operate in the FAN mode to dry inside the indoor unit.

Emergency operation
When the remote controller cannot be used...
Emergency operation can be activated by pressing the emergency operation switch (E.O.SW) on the indoor unit.

Emergency COOL
Emergency HEAT
Stop

Operation indicator lamp
The operation indicator lamp shows the operation state of the unit.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Operation state</th>
<th>Room temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>(AUTO)</td>
<td>The unit is operating to reach the set temperature</td>
<td>About 2°C or more away from set temperature</td>
</tr>
<tr>
<td>(DRY)</td>
<td>The room temperature is approaching the set temperature</td>
<td>About 1 to 2°C from set temperature</td>
</tr>
<tr>
<td>°C</td>
<td>Demand Response mode</td>
<td>Page 10</td>
</tr>
</tbody>
</table>

Emergency mode

<table>
<thead>
<tr>
<th>Operation indicator lamp</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lighted</td>
</tr>
</tbody>
</table>

Note:
• The first 30 minutes of operation is test run. Temperature control does not work, and fan speed is set to High.
• In the emergency heating operation, the fan speed gradually rises to blow out warm air.

Auto restart function
If a power failure occurs or the main power is turned off during operation, “Auto restart function” automatically starts operation in the same mode as the one set with the remote controller just before the shutoff of the main power. When timer is set, timer setting is cancelled and the unit starts operation when power is resumed.

If you do not want to use this function, please consult the service representative because the setting of the unit needs to be changed.
**FAN SPEED AND AIRFLOW DIRECTION ADJUSTMENT**

Press [FAN] to select fan speed. Each press changes fan speed in the following order:

- Two short beeps are heard from the indoor unit when set to AUTO.
- Use higher fan speed to cool/heat the room more powerfully. It is recommended to lower the fan speed once the room is cool/warm.
- Use lower fan speed for quiet operation.

Press [VANE] to select airflow direction. Each press changes airflow direction in the following order:

- Two short beeps are heard from the indoor unit when set to AUTO.

### <GL25/35/42/50/60>

*Airflow direction*

- AUTO: The vane is set to the most efficient airflow direction. COOL/DRY/FAN: horizontal position. HEAT: position (4).
- Manual: For efficient air conditioning, select the upper position for COOL/DRY, and the lower position for HEAT. If the lower position is selected during COOL/DRY, the vane automatically moves to the horizontal position after 0.5 to 1 hour to prevent any condensation from dripping.
- Swing: The vane moves up and down intermittently.

**To change the horizontal airflow direction.**

Move the vertical vane manually before starting operation.

### <GL71/80>

*Airflow direction*

- AUTO: The vane is set to the most efficient airflow direction. COOL/DRY/FAN: horizontal position. HEAT: position (5).
- Manual: For efficient air conditioning, select the upper position for COOL/DRY, and the lower position for HEAT. If the lower position is selected during COOL/DRY, the vane automatically moves to the horizontal position after 0.5 to 1 hour to prevent any condensation from dripping.
- Swing: The vane moves up and down intermittently.
**OPERATING INSTRUCTIONS**

### LONG OPERATION

**<GL71/80 only>**

Press **LONG** to start LONG operation.
- Fan speed increases and the horizontal vane moves to the position for LONG mode.
- Air reaches to longer distance.

Press **LONG** again to cancel LONG operation.
- LONG operation is cancelled when the OFF/ON, VANE, or ECONO COOL button is pressed.

### I-SAVE OPERATION

1. Press **I-SAVE** during COOL, ECONO COOL, or HEAT mode to select i-save mode.

2. Set the temperature, fan speed, and airflow direction.
   - The same setting is selected from the next time by simply pressing **I-SAVE**.
   - Two settings can be saved. (One for COOL/ECONO COOL, one for HEAT)
   - Select the appropriate temperature, fan speed, and airflow direction according to your room.
   - Normally, the minimum temperature setting in HEAT mode is 16°C. However, during i-save operation only, the minimum temperature setting is 10°C.

Press **I-SAVE** again to cancel i-save operation.
- i-save operation also is canceled when the MODE or POWERFUL button is pressed.

### POWERFUL OPERATION

**<GL71/80 only>**

Press **POWERFUL** during COOL or HEAT mode to start POWERFUL operation.

- Fan speed : Exclusive speed for POWERFUL mode
- Horizontal vane : Set position, or downward airflow position during AUTO setting
- Temperature cannot be set during POWERFUL operation.

Press **POWERFUL** again to cancel POWERFUL operation.
- POWERFUL operation also is cancelled automatically in 15 minutes, or when the OFF/ON, FAN, ECONO COOL, or i-save button is pressed.

### Example of use:

1. Low energy mode
   - Set the temperature 2°C to 3°C warmer in COOL and cooler in HEAT mode.
   - This setting is suitable for unoccupied room, and while you are sleeping.

2. Saving frequently used settings
   - Save your preferred setting for COOL/ECONO COOL and HEAT. This enables you to select your preferred setting with a single push of the button.
ECONO COOL OPERATION

Press during COOL mode to start ECONO COOL operation. The unit performs swing operation vertically in various cycles according to the temperature of airflow.

Press again to cancel ECONO COOL operation. • ECONO COOL operation is canceled when the VANE, LONG, or POWERFUL button is pressed.

What is “ECONO COOL”? Swing airflow (change of airflow) makes you feel cooler than stationary airflow. The set temperature and the airflow direction is automatically changed by the microprocessor. It is possible to perform cooling operation with keeping comfort. As a result energy can be saved.

TIMER OPERATION (ON/OFF TIMER)

1 Press or during operation to set the timer. 
   - (ON timer) : The unit turns ON at the set time.
   - (OFF timer) : The unit turns OFF at the set time.

   * or blinks.
   * Make sure that the current time and day are set correctly. Page 4

2 Press (Increase) and (Decrease) to set the time of timer.
   Each press increases or decreases the set time by 10 minutes.
   * Set the timer while or is blinking.

3 Press or again to cancel timer.

Note:
• ON and OFF timers can be set together. mark indicates the order of timer operations.
• If power failure occurs while ON/OFF timer is set, see Auto restart function.
WEEKLY TIMER OPERATION

• A maximum of 4 ON or OFF timers can be set for individual days of the week.
• A maximum of 28 ON or OFF timers can be set for a week.

Setting the weekly timer

1. Press \( \text{SET} \) to enter the weekly timer setting mode.
   * \( \text{SET} \) blinks.

2. Press \( \text{DAY} \) and \( 1-4 \) to select setting day and number.
   * \( \text{DAY} \) selects the day of the week to be set.
   * \( 1-4 \) selects the setting number.
   * All days can be selected.

3. Press \( \text{ON/OFF} \), \( \text{TIME} \), and \( \text{TEMP} \) to set ON/OFF, time, and temperature.
   * E.g.: [ON], [6:00] and [24°C] are selected.

4. Press \( \text{SET} \) to complete and transmit the weekly timer setting.
   * Press \( \text{SET} \) to transmit the setting information of weekly timer to the indoor unit. Point the remote controller toward the indoor unit for 3 seconds.
   * When setting the timer for more than one day of the week or one number, \( \text{SET} \) does not have to be pressed per each setting. Press \( \text{SET} \) once after all the settings are complete. All the weekly timer settings will be saved.
   * Press \( \text{SET} \) and hold for 5 seconds to erase all weekly timer settings. Point the remote controller toward the indoor unit.

5. Press \( \text{ON/OFF} \) to turn the weekly timer ON. ( \( \text{ON/OFF} \) lights.)
   * When the weekly timer is ON, the day of the week whose timer setting is complete, will light.

6. Press \( \text{ON/OFF} \) again to turn the weekly timer OFF. ( \( \text{ON/OFF} \) goes out.)
   * The saved settings will not be cleared when the weekly timer is turned OFF.

Checking weekly timer setting

1. Press \( \text{SET} \) to enter the weekly timer setting mode.
   * \( \text{SET} \) blinks.

2. Press \( \text{DAY} \) or \( 1-4 \) to view the setting of the particular day or number.

3. Press \( \text{CANCEL} \) to exit the weekly timer setting.

Note:
When all days of the week are selected to view the settings and a different setting is included among them, \( \text{C} \) will be displayed.

Note:
The simple ON/OFF timer setting is available while the weekly timer is on. In this case, the ON/OFF timer has priority over the weekly timer; the weekly timer operation will start again after the simple ON/OFF timer is complete.
Demand response
This unit has demand response capability which is compliant with AS/NZS 4755.3.1.
To activate this function, you need to make a contract with remote agents such as electric supply company, then this unit should be connected to Demand response enabling devise (DRED). For further information, consult your dealer.
Demand response represents the automated alteration of an electrical product’s normal mode of operation in response to an initiating signal originating from or defined by a remote agent.

This unit supports 3 Demand Response Modes (DRMs).

<table>
<thead>
<tr>
<th>DRM</th>
<th>Description of operation in this mode</th>
<th>Operation indicator lamp</th>
</tr>
</thead>
</table>
| DRM 1 | Compressor off  
The air conditioner does not perform cooling or heating operation during the demand response event.                                                                                                                      | Upper lamp is lighted.    |
| DRM 2 | The air conditioner continues to perform cooling or heating operation during the demand response event, but the electrical energy consumed by the air conditioner in a half hour period is not more than 50% of the total electrical energy that would be consumed if operating at the rated capacity in a half hour period. | Lower lamp blinks.        |
| DRM 3 | The air conditioner continues to perform cooling or heating operation during the demand response event, but the electrical energy consumed by the air conditioner in a half hour period is not more than 75% of the total electrical energy that would be consumed if operating at the rated capacity in a half hour period. | 2.5 sec 0.5 sec 2.5 sec 2.5 sec |

Note:
- DRM is automatically activated or released according to the signals from DRED.
- DRM cannot be invalidated or changed manually.
- You might feel this unit does not sufficiently perform cooling or heating operation during DRM.
- Operation settings can be changed as usual with the remote controller during DRM. However, you might not feel cool or warm enough as DRM is prioritized.
OPERATING INSTRUCTIONS

CLEANING

Instructions:
- Switch off the power supply or turn off the breaker before cleaning.
- Be careful not to touch the metal parts with your hands.
- Do not use benzene, thinner, polishing powder, or insecticide.
- Use only diluted mild detergents.
- Do not expose parts to direct sunlight, heat, or fire to dry.
- Do not use water hotter than 50°C.

Air outlet and Fan (before cleaning, make sure that the fan is stopped)

1. **<GL25/35/42/50/60>**
   - Turn the horizontal vane downward. Then, remove the vane as shown in ① and ②.
   - Repeat ① and ② for the lower vane.

2. **<GL71/80>**
   - Swing out the two vertical vanes one by one.

3. **<GL25/35/42/50/60>**
   - Clean the air outlet and fan. Wipe with a soft dry cloth.

4. **<GL71/80>**
   - Put the vertical vanes back to their original positions correctly one by one, into their respective guide.
   - Push the vanes until they click into place.

5. **<GL25/35/42/50/60>**
   - Install the horizontal vanes by following the removal procedure in reverse.
   - If the horizontal vanes are not installed correctly, all LED lamps blink when power is turned on.

Air filter

- **Clean every 2 weeks**
- Remove dirt by a vacuum cleaner, or rinse with water.
- After washing with water, dry it well in shade.

Front panel

GL71/80 only

- Lift the front panel until a “click” is heard.
- Hold the hinges and pull to remove as shown in the above illustration.
- Wipe with a soft dry cloth or rinse with water.
- Do not soak it in water for more than two hours.
- Dry it well in shade.

3. Install the front panel by following the removal procedure in reverse. Close the front panel securely and press the positions indicated by the arrows.

Air cleaning filter (Anti-Allergy Enzyme Filter)

Back side of air filter

- Clean every 3 months:
  - Remove dirt by a vacuum cleaner.
  - Put it back to its original position, and install all tabs of the air filter.

When dirt cannot be removed by vacuum cleaning:

- Soak the filter and its frame in lukewarm water before rinsing it.
- (Diluted mild detergents can be used when dirt cannot be removed.)
- After washing with water, dry it well in shade. Install all tabs of the air filter.

Every year:

- Replace it with a new air cleaning filter for best performance.
- Parts Number:
  - GL25/35/42/50/60: MAC-408FT-E
  - GL71/80: MAC-24001-E

Important

- Clean the filters regularly for best performance and to reduce power consumption.
- Dirty filters cause condensation in the air conditioner which will contribute to the growth of fungi such as mold. It is therefore recommended to clean air filters every 2 weeks.

Air filter

- **Clean every 2 weeks**
- Remove dirt by a vacuum cleaner, or rinse with water.
- After washing with water, dry it well in shade.

Note:

Do not apply excessive force to the fan or fan guard.
## WHEN YOU THINK THAT TROUBLE HAS OCCURRED

Even if these items are checked, when the unit does not recover from the trouble, stop using the air conditioner and consult your dealer.

<th>Explanation &amp; Check points</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Indoor Unit</strong></td>
<td></td>
</tr>
<tr>
<td>The unit cannot be operated.</td>
<td>- Is the breaker turned on?</td>
</tr>
<tr>
<td>- Is the power supply plug connected?</td>
<td></td>
</tr>
<tr>
<td>- Is the ON timer set?</td>
<td>Page 9</td>
</tr>
<tr>
<td>All LED lamps on the indoor unit are blinking.</td>
<td>- Are the horizontal vanes installed correctly?</td>
</tr>
<tr>
<td>The horizontal vane does not move.</td>
<td>- Are the horizontal vane and the vertical vane installed correctly?</td>
</tr>
<tr>
<td>- Is the fan guard deformed?</td>
<td></td>
</tr>
<tr>
<td>The unit cannot be operated for about 3 minutes when restarted.</td>
<td>- This protects the unit according to instructions from the microprocessor. Please wait.</td>
</tr>
<tr>
<td>Mist is discharged from the air outlet of the indoor unit.</td>
<td>- The cool air from the unit rapidly cools moisture in the air inside the room, and it turns into mist.</td>
</tr>
<tr>
<td>The swing operation of the HORIZONTAL VANE is suspended for a while, then restarted.</td>
<td>This is for the swing operation of the HORIZONTAL VANE to be performed normally.</td>
</tr>
<tr>
<td>The airflow direction changes during operation.</td>
<td>- When the unit is operated in COOL or DRY mode, if the operation continues with air blowing down for 0.5 to 1 hour, the direction of the airflow is automatically set to horizontal position to prevent water from condensing and dripping.</td>
</tr>
<tr>
<td>The direction of the horizontal vane cannot be adjusted with the remote controller.</td>
<td>- In the heating operation, if the airflow temperature is too low or when defrosting is being done, the horizontal vane is automatically set to horizontal position.</td>
</tr>
<tr>
<td>The operation stops for about 10 minutes in the heating operation.</td>
<td>- Outdoor unit is in defrost. Since this is completed in max. 10 minutes, please wait. (When the outside temperature is too low and humidity is too high, frost is formed.)</td>
</tr>
<tr>
<td>The unit starts operation by itself when the main power is turned on, but isn’t received sign from the remote controller.</td>
<td>- These models are equipped with an auto restart function. When the main power is turned off without stopping the unit with the remote controller and is turned on again, the unit starts operation automatically in the same mode as the one set with the remote controller just before the shutoff of the main power. Refer to “Auto restart function” Page 5</td>
</tr>
<tr>
<td>In COOL/DRY mode, when the room temperature reaches near the set temperature, the outdoor unit stops, then the indoor unit operates at low speed.</td>
<td>- When the room temperature rises and the outdoor unit turns on, the indoor fan starts running according to the settings on the remote controller.</td>
</tr>
<tr>
<td>The indoor unit discolors over time.</td>
<td>- Although plastic turns yellow due to the influence of some factors such as ultraviolet light and temperature, this has no effect on the product functions.</td>
</tr>
<tr>
<td><strong>Outdoor Unit</strong></td>
<td></td>
</tr>
<tr>
<td>The fan of the outdoor unit does not rotate even though the compressor is running. Even if the fan starts to rotate, it stops soon.</td>
<td>- When the outside temperature is low during cooling operation, the fan operates intermittently to maintain sufficient cooling capacity.</td>
</tr>
<tr>
<td>Water leaks from the outdoor unit.</td>
<td>- During COOL and DRY operations, pipe or pipe connecting sections are cooled and this causes water to condense.</td>
</tr>
<tr>
<td>- In the heating operation, water condensed on the heat exchanger drips down.</td>
<td></td>
</tr>
<tr>
<td>- In the heating operation, the defrosting operation makes ice forming on the outdoor unit melt and drip down.</td>
<td></td>
</tr>
<tr>
<td>White smoke is discharged from the outdoor unit.</td>
<td>- In the heating operation, vapor generated by the defrosting operation looks like white smoke.</td>
</tr>

<tr>
<td>The air from the indoor unit smells strange.</td>
<td>- Are the filters clean?</td>
</tr>
<tr>
<td>- Is the fan or heat exchanger of the indoor unit clean?</td>
<td></td>
</tr>
<tr>
<td>The unit may suck in an odor adhering to the wall, carpet, furniture, cloth, etc. and blow it out with the air.</td>
<td></td>
</tr>
<tr>
<td>Sound</td>
<td></td>
</tr>
<tr>
<td>Cracking sound is heard.</td>
<td>- This sound is generated by the expansion/contraction of the front panel, etc. due to change in temperature.</td>
</tr>
<tr>
<td>“Burbling” sound is heard.</td>
<td>- This sound is heard when the outside air is absorbed from the drain hose by turning on the range hood or the ventilation fan, making water flowing in the drain hose to spout out.</td>
</tr>
<tr>
<td>This sound is also heard when the outside air blows into the drain hose in case the outside wind is strong.</td>
<td></td>
</tr>
<tr>
<td>Mechanical sound is heard from the indoor unit.</td>
<td>- This is the switching sound in turning off/on the fan or the compressor.</td>
</tr>
<tr>
<td>The sound of water flowing is heard.</td>
<td>- This is the sound of refrigerant or condensed water flowing in the unit.</td>
</tr>
<tr>
<td>Hissing sound is sometimes heard.</td>
<td>- This is the sound when the flow of refrigerant inside the unit is changed.</td>
</tr>
</tbody>
</table>

<tbody>
<tr>
<td>Weekly timer does not operate according to settings.</td>
<td>- Is the ON/OFF timer set?</td>
</tr>
<tr>
<td>- Transmit the setting information of the weekly timer to the indoor unit again. When the information is successfully received, a long beep signal will sound from the indoor unit. If information fails to be received, 3 short beeps will be heard. Ensure information is successfully received.</td>
<td></td>
</tr>
<tr>
<td>- When a power failure occurs and the main power turns off, the indoor unit built-in clock will be incorrect. As a result, the weekly timer may not work normally. Be sure to place the remote controller where the signal can be received by the indoor unit.</td>
<td></td>
</tr>
<tr>
<td>The unit starts/stops the operation by itself.</td>
<td>- Is the weekly timer set?</td>
</tr>
</tbody>
</table>
In the following cases, stop using the air conditioner and consult your dealer.

- When water leaks or drips from the indoor unit.
- When the upper operation indicator lamp blinks.
- When the breaker trips frequently.
- The remote control signal is not received in a room where an electronic ON/OFF type fluorescent lamp (inverter-type fluorescent lamp, etc.) is used.
- Operation of the air conditioner interferes with radio or TV reception. An amplifier may be required for the affected device.
- When an abnormal sound is heard.
- When any refrigerant leakage is found.
Installation place and electrical work

Installation place
Avoid installing the air conditioner in the following places.
- Where there is much machine oil.
- Salty places such as the seaside.
- Where sulfide gas is generated such as hot spring, sewage, waste water.
- Where oil is splashed or where the area is filled with oily smoke (such as cooking areas and factories, in which the properties of plastic could be changed and damaged).
- Where there is high-frequency or wireless equipment.
- Where the air from the outdoor unit air outlet is blocked.
- Where the operation sound or air from the outdoor unit bothers the house next door.
- The mounting height of indoor unit 1.8m to 2.3m is recommended. If it is impossible, please consult your dealer.

Electrical work
- Provide an exclusive circuit for the power supply of the air conditioner.
- Be sure to observe the breaker capacity.

If you have any questions, consult your dealer.
