Prior to use, thoroughly read the instructions in this manual to use the product correctly. Retain for future reference.
Make sure that this CD-ROM and the Installation Manual are passed on to any future users. To ensure safety and proper operation of the remote controller, the remote controller should only be installed by qualified personnel.
Product features

Feature 1

Large, easy-to-see display

Full-dot LCD display with large characters for easy viewing

Feature 2

Simple button arrangement

Feature 3

Large, easy-to-press buttons

Buttons are arranged according to usage to allow for intuitive navigation.

Frequently used buttons are larger than other buttons to prevent unintended pressing of other buttons.

Safety precautions

• Thoroughly read the following safety precautions before using the unit.
• Observe these precautions carefully to ensure safety.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>Indicates a risk of death or serious injury.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CAUTION</td>
<td>Indicates a risk of serious injury or structural damage.</td>

• After reading this manual, pass it on to the end user to retain for future reference.
• Keep this manual for future reference and refer to it as necessary. This manual should be made available to those who repair or relocate the controller. Make sure that the manual is passed on to any future users.

General precautions

**WARNING**

Do not install the unit in a place where large amounts of oil, steam, organic solvents, or corrosive gases, such as sulfuric gas, are present or where acidic/alkaline solutions or sprays are used frequently. These substances can compromise the performance of the unit or cause certain components of the unit to corrode, which can result in electrical shock, malfunctions, smoke, or fire.

To reduce the risk of injury or electric shock, before spraying a chemical around the controller, stop the operation and cover the controller.

To reduce the risk of shorting, current leakage, electric shock, malfunctions, smoke, or fire, do not wash the controller with water or any other liquid.

To reduce the risk of injury or electric shock, stop the operation and switch off the power supply before cleaning, maintaining, or inspecting the controller.

If any abnormality (e.g., burning smell) is noticed, stop the operation, turn off the power switch, and consult your dealer. Continued use of the product may result in electric shock, malfunctions, or fire.

To reduce the risk of environmental pollution, consult an authorized agency for proper disposal of remote controller.

Properly install all required covers to keep moisture and dust out of the controller. Dust accumulation and water can cause electric shock, smoke, or fire.

To reduce the risk of fire or explosion, do not place flammable materials or use flammable sprays around the controller.

To reduce the risk of electric shock or malfunctions, do not directly spray insecticide or other flammable sprays on the controller.

**CAUTION**

When disinfecting the unit using alcohol, ventilate the room adequately. The fumes of the alcohol around the unit may cause a fire or explosion when the unit is turned on.

To reduce the risk of injury or electric shock, before spraying a chemical around the controller, stop the operation and cover the controller.

To reduce the risk of injury or electric shock, stop the operation and switch off the power supply before cleaning, maintaining, or inspecting the controller.

If any abnormality (e.g., burning smell) is noticed, stop the operation, turn off the power switch, and consult your dealer. Continued use of the product may result in electric shock, malfunctions, or fire.

Properly install all required covers to keep moisture and dust out of the controller. Dust accumulation and water can cause electric shock, smoke, or fire.

To reduce the risk of fire or explosion, do not place flammable materials or use flammable sprays around the controller.

To reduce the risk of damage to the controller, do not directly spray insecticide or other flammable sprays on the controller.

To reduce the risk of electric shock or malfunctions, do not touch the touch panel, switches, or buttons with a pointy or sharp object.
To reduce the risk of injury and electric shock, avoid contact with sharp edges of certain parts.

To reduce the risk of injury, wear protective gear when working on the controller.

To avoid injury from broken glass, do not apply excessive force on the glass parts.

Precautions for moving or repairing the controller

⚠️ WARNING

The controller should be repaired or moved only by qualified personnel. Do not disassemble or modify the controller. Improper installation or repair may cause injury, electric shock, or fire.

⚠️ CAUTION

To reduce the risk of shorting, electric shock, fire, or malfunction, do not touch the circuit board with tools or with your hands, and do not allow dust to accumulate on the circuit board.

Additional precautions

To avoid damage to the controller, use appropriate tools to install, inspect, or repair the controller.

To avoid discoloration, do not use benzene, thinner, or chemical rag to clean the controller. To clean the controller, wipe with a soft cloth soaked in water with mild detergent, wipe off the detergent with a wet cloth, and wipe off water with a dry cloth.

This controller is designed for exclusive use with the Building Management System by Mitsubishi Electric. The use of this controller for with other systems or for other purposes may cause malfunctions.

To avoid damage to the controller, provide protection against static electricity.

Press to turn ON/OFF the indoor unit.

Press to save the setting.

Press to return to the previous screen.

Press to bring up the Main menu.

Operation settings will appear. When the backlight is off, pressing any button turns the backlight on and it will stay lit for a certain period of time depending on the screen.

When the backlight is off, pressing any button turns the backlight on and does not perform its function. (except for the ON/OFF button)

This lamp lights up in green while the unit is in operation. It blinks while the remote controller is starting up or when there is an error.

The functions of the function buttons change depending on the screen. Refer to the button function guide that appears at the bottom of the LCD for the functions they serve on a given screen.
When the system is centrally controlled, the button function guide that corresponds to the locked button will not appear.

Main display: Press to change the operation mode.
Main menu: Press to move the cursor down.

Main display: Press to decrease temperature.
Main menu: Press to move the cursor up.

Main display: Press to increase temperature.
Main menu: Press to go to the previous page.

Main display: Press to change the fan speed.
Main menu: Press to go to the next page.
The main display can be displayed in two different modes: "Full" and "Basic." The factory setting is "Full." To switch to the "Basic" mode, change the setting on the Main display setting. (Refer to page 46.)

### Icon explanations

- **Main**: Indicates settings that can be made only from the main remote controller.
- **ON**: Indicates settings that can be changed only while the units are in operation.
- **OFF**: Indicates settings that can be changed only while the units are not in operation.
- **/\**: Indicates settings that can be changed only while the units are operated in the Cool, Heat, or Auto mode.
- **\**: Indicates functions that are not available when the buttons are locked or the system is centrally controlled.
Basic operations

Power ON/OFF

Button operation

ON

Press the ON/OFF button.
The ON/OFF lamp will light up in green, and the operation will start.

OFF

Press the ON/OFF button again.
The ON/OFF lamp will come off, and the operation will stop.
## Operation status memory

</tr>
<tr>
<td>Fan/Ventilation</td>
<td>Not settable</td>
</tr>
</tbody>
</table>

The settable temperature range varies with the model of indoor units.
Operation mode, temperature, and fan speed settings

Button operation

Operation mode

Press the F1 button to go through the operation modes in the order of "Cool, Dry, Fan, Auto, and Heat." Select the desired operation mode.

- Operation modes that are not available to the connected indoor unit models will not appear on the display.

What the blinking mode icon means

The mode icon will blink when other indoor units in the same refrigerant system (connected to the same outdoor unit) are already operated in a different mode. In this case, the rest of the unit in the same group can only be operated in the same mode.

<AUTO (dual set point) mode>

When the operation mode is set to the Auto (dual set point) mode, two preset temperatures (one each for cooling and heating) can be set. Depending on the room temperature, indoor unit will automatically operate in either the Cool or Heat mode and keep the room temperature within the preset range.

The graph below shows the operation pattern of indoor unit operated in the Auto (dual set point) mode.
Preset temperature

<Cool, Dry, Heat, and Auto (single set point)>

Press the F2 button to decrease the preset temperature, and press the F3 button to increase.

- Refer to the table on page 13 for the settable temperature range for different operation modes.
- Preset temperature range cannot be set for Fan/Ventilation operation.
- Preset temperature will be displayed either in Centigrade in 0.5- or 1-degree increments, or in Fahrenheit, depending on the indoor unit model and the display mode setting on the remote controller.

Example display
(Centigrade in 0.5-degree increments)

<Auto (dual set point) mode>

The current preset temperatures will appear. Press the F2 or F3 button to display the Settings screen.
Basic operations

2 Preset temperature for cooling
Preset temperature for heating

Press the F1 or F2 button to move the cursor to the desired temperature setting (cooling or heating).

Press the F3 button to decrease the selected temperature, and F4 to increase.

• Refer to the table on page 13 for the settable temperature range for different operation modes.
• The preset temperature settings for cooling and heating in the Auto (dual set point) mode are also used by the Cool/Dry and Heat modes.
• The preset temperatures for cooling and heating in the Auto (dual set point) mode must meet the conditions below:
  • Preset cooling temperature is higher than preset heating temperature.
  • The minimum temperature difference requirement between cooling and heating preset temperatures (varies with the models of indoor units connected) is met.
  * If preset temperatures are set in a way that does not meet the minimum temperature difference requirement, both preset temperatures will automatically be changed within the allowable setting ranges.

Navigating through the screens
• To return to the Main screen ...... RETURN button

Fan speed

Press the F4 button to go through the fan speeds in the following order.

• The available fan speeds depend on the models of connected indoor units.
Navigating through the menu

Navigating through the menu

Navigating through the Main menu

Button operation

Accessing the Main menu

Press the \[ \text{MENU} \] button. The Main menu will appear.

Item selection

Press \[ \text{F1} \] to move the cursor down. Press \[ \text{F2} \] to move the cursor up.

Navigating through the pages

Press \[ \text{F3} \] to go to the previous page. Press \[ \text{F4} \] to go to the next page.
Saving the settings

Select the desired item, and press the **SELECT** button.

The screen to set the selected item will appear.

Exiting the Main menu screen

Press the **RETURN** button to exit the Main menu and return to the Main display.

If no buttons are touched for 10 minutes, the screen will automatically return to the Main display. Any settings that have not been saved will be lost.

Display of unsupported functions

The message at left will appear if the user selects a function not supported by the corresponding indoor unit model.
Vane•Louver•Vent. (Lossnay)

Button operation

Accessing the menu

Select "Vane•Louver•Vent. (Lossnay)" from the Main menu (refer to page 20), and press the SELECT button.

Vane setting

Select "Swing" to move the vanes up and down automatically.

When set to "Step 1" through "Step 5", the vane will be fixed at the selected angle.

• under the vane setting icon

This icon will appear when the vane is set to "Step 5" and the fan operates at low speed during cooling or dry operation (depends on the model).

The icon will go off in an hour, and the vane setting will automatically change.
Louver setting

Press the F4 button to turn the louver swing ON and OFF.

(Sample screen on City Multi)

Vent. setting

Press the F3 button to go through the ventilation setting options in the order of "Off," "Low," and "High."

* Settable only when LOSSNAY unit is connected.

(Sample screen on Mr. Slim)

Returning to the Main menu

Press the RETURN button to go back to the Main menu.
Controller operation-Function settings

High power

Function description

High-power operation function allows the units to operate at higher-than-normal capacity so that the room air can be conditioned to an optimum temperature quickly. This operation will last for up to 30 minutes, and the unit will return to the normal operation mode at the end of the 30 minutes or when the room temperature reaches the preset temperature, whichever is earlier. The units will return to the normal operation when the operation mode or fan speed is changed.

Button operation

1. Select "High power" from the Main menu during Cooling, Heating, or AUTO operation (refer to page 20), and press the SELECT button.

2. Move the cursor to "YES" with the F3 or F4 button, and press the SELECT button.

A confirmation screen will appear.

Navigating through the screens

- To go back to the Main menu .......... MENU button
- To return to the previous screen .......... RETURN button
Select "Initial setting" from the Main menu (refer to page 20), and press the [SELECT] button.

Clock setting is required before making the following settings.
• On/Off timer
• Weekly timer
• OU silent mode
• Energy saving
• Night setback

Move the cursor to the "Clock" with the [F1] or [F2] button, and press the [SELECT] button.

Move the cursor to the desired item with the [F1] or [F2] button out of year, month, date, hour, or minute.

Increase or decrease the value for the selected item with the [F3] or [F4] button, and press the [SELECT] button.

A confirmation screen will appear.

Navigating through the screens
• To go back to the Main menu .......... [MENU] button
• To return to the previous screen ...... [RETURN] button
Controller operation-Function settings

On/Off timer

Button operation

1. Select "Timer" from the Main menu (refer to page 20), and press the SELECT button.

The On/Off timer will not work in the following cases:
when On/Off timer is disabled, during an error, during check (in the service menu), during test run, during remote controller diagnosis, when the clock is not set, during Function setting, when the system is centrally controlled (when On/Off operation or Timer operation from local remote controller is prohibited).

2. The current settings will appear.

Move the cursor to the On/Off timer, and press the SELECT button.

3. The screen to set the timer will appear.

Select the desired item with the F1 or F2 button out of "On/Off timer," "On," "Off," or "Repeat."
Change the setting with the F3 or F4 button.

- **On/Off timer**: No (disable)/Yes (enable)
- **On**: Operation start time
  (settable in 5-minute increments)
  *Press and hold the button to rapidly advance the numbers.
- **Off**: Operation stop time
  (settable in 5-minute increments)
  *Press and hold the button to rapidly advance the numbers.
- **Repeat**: No (once)/Yes (repeat)

Press the SELECT button to save the settings.

A confirmation screen will appear.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button

will appear on the Main display in the Full mode when the On/Off timer is enabled.

appears when the timer is disabled by the centralized control system.
Controller operation-Function settings

Timer

Auto-Off timer

Button operation

1. Bring up the Timer setting screen. (Refer to page 26.)
   Select "Auto-Off", and press the SELECT button.

   The Auto-Off timer will not work in the following cases:
   when Auto-Off timer is disabled, during an error, during check (in the service menu), during test run, during remote controller diagnosis, during Function setting, when the system is centrally controlled (when On/Off operation or Timer operation from local controller is prohibited).

2. The current settings will appear.
   Move the cursor to the "Auto-Off" or "Stop in --- min" with the F1 or F2 button.

3. Change the setting with the F3 or F4 button.
   • Auto-Off: No (disable)/Yes (enable)
   • Stop in --- min: Timer setting (The settable range is 30 to 240 minutes in 10-minute increments.)
Press the **SELECT** button to save the settings.

A confirmation screen will appear.

**Navigating through the screens**
- To go back to the Main menu ............ **MENU** button
- To return to the previous screen ...... **RETURN** button

🔄 will appear on the Main display in the Full mode when the Auto-Off timer is enabled.

🔄 appears when the timer is disabled by the centralized control system.
Controller operation-Function settings

Weekly timer

1. Select "Weekly timer" from the Main menu (refer to page 20), and press the SELECT button.

The Weekly timer will not work in the following cases:
- when the On/Off timer is enabled,
- when the weekly timer is disabled,
- during an error,
- during check (in the service menu),
- during test run,
- during remote controller diagnosis,
- when the clock is not set,
- during Function setting,
- when the system is centrally controlled (On/Off operation, temperature setting, or Timer operation from local remote controller is prohibited).

2. The current settings will appear.

Press the F1 or F2 button to see the settings for each day of the week.
Press the F4 button to see patterns 5 through 8.

Press the SELECT button to go to the setting screen.

3. The screen to enable (Yes) and disable (No) the weekly timer will appear.

To enable the setting, move the cursor to "Yes" with the F3 or F4 button, and press the SELECT button.
The weekly timer setting screen will appear and the current settings will be displayed.
Up to eight operation patterns can be set for each day.
Move the cursor to the desired day of the week with the [F1] or [F2] button, and press the [F3] button to select it. (Multiple days can be selected.)

Press the SELECT button.

Operation pattern setting screen will appear.
Press the [F1] button to move the cursor to the desired pattern number.
Move the cursor to the time, On/Off, or temperature with the [F2] button.
Change the settings with the [F3] or [F4] button.
• Time: settable in 5-minute increments
* Press and hold the button to rapidly advance the numbers.
• On/Off/Auto: Selectable settings depend on the model of connected indoor unit. (When an Auto pattern is executed, the system will operate in the Auto (dual set point) mode.)
• Temperature: The settable temperature range depends on the connected indoor units. (1°C increments)
When the Auto (dual set point) mode is selected, two preset temperatures can be set. If an operation pattern with a single preset temperature setting is executed during the Auto (dual set point) mode, its setting will be used as the cooling temperature setting in the Cool mode.

Press the SELECT button to save the settings.
A confirmation screen will appear.

Navigating through the screens
• To go back to the setting change/day of the week selection screen .................... SELECT button
• To go back to the Main menu .................. MENU button
• To return to the previous screen ........... RETURN button

will appear on the Main display in the Full mode when the weekly timer setting for the current day exists.
The icon will not appear while the On/Off timer is enabled or the system is under centralized control (Timer operation from local remote controller is prohibited).
Controller operation-Function settings

OU silent mode

Function description

This function allows the user to set the time periods in which priority is given to quiet operation of outdoor units over temperature control. Set the start and stop times each day of the week for the quiet operation. Select the desired silent level from "Middle" and "Quiet".

Button operation

1. Select "OU silent mode" from the Main menu (refer to page 20), and press the SELECT button.

2. The current settings will appear.
   - Press the [F1] or [F2] button to see the settings for each day of the week.
   - Press the SELECT button to go to the setting screen.

3. The screen to enable (Yes) and disable (No) the silent mode will appear.
   - To enable this setting, move the cursor to "Yes" with the [F3] or [F4] button, and press the SELECT button.
The OU silent mode setting screen will appear.

To make or change the setting, move the cursor to the desired day of the week with the $F1$ or $F2$ button, and press the $F3$ button to select it. (Multiple days can be selected.)

Press the SELECT button.

The setting screen will appear.

Move the cursor to the desired item with the $F1$ or $F2$ button out of Start time, Stop time, or Silent level.

Change the settings with the $F3$ or $F4$ button.

- Start/Stop time: settable in 5-minute increments
  - Press and hold the button to rapidly advance the numbers.
- Silent level: Normal, Middle, Quiet

Press the SELECT button to save the settings. A confirmation screen will appear.

Navigating through the screens
- To go back to the setting change/day of the week selection screen .................... SELECT button
- To go back to the Main menu ............ MENU button
- To return to the previous screen ...... RETURN button

will appear on the Main display in the Full mode during the OU silent mode.

will appear on the Main display in the Full mode when the temperature range is restricted.
Operation lock function

To enable the operation lock function, set the item "Operation locked" to "Yes".

Bring up the Restriction setting screen. (Refer to page 34.)

Move the cursor to "Operation locked" and press the SELECT button.

The screen to make the settings for the operation lock function will appear.

Move the cursor to the desired item with the F1 or F2 button out of "Operation locked," "On/Off," "Mode," "Set temp.," or "Vane."

Change the settings with the F3 or F4 button.

- Operation locked: No (disable)/Yes (enable)
- On/Off: On/Off operation
- Mode: Operation mode setting
- Set temp.: Preset temp. setting
- Vane: Vane setting

Press the SELECT button to save the settings. A confirmation screen will appear.

Navigating through the screens

- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button
will appear on the Main display in the Full mode when the operation lock function setting is enabled.

Operation guide that corresponds to the locked function will be suppressed.

(When Set temp. is locked)
Controller operation-Function settings

Energy saving

Automatic return to the preset temperature

Button operation

1. Select "Energy saving" from the Main menu (refer to page 20), and press the SELECT button.

2. The current settings will appear.

3. The screen to make the settings for the automatic return to the preset temperature will appear.

4. Move the cursor to the desired item with the F1 or F2 button out of "Auto return," "Cool," or "Heat."
Change the settings with the F3 or F4 button.
- Auto return: No (disable)/Yes (enable)
- Cool: Timer setting range is 30 to 120 minutes in 10-minute increments.
  Temperature setting range is 19 to 30ºC (67 to 87ºF) (1ºC increments).
- Heat: Timer setting range is 30 to 120 minutes in 10-minute increments.
  Temperature setting range is 17 to 28ºC (63 to 83ºF) (1ºC increments).

Press the SELECT button to save the settings. "Cool" includes "Dry" and "AUTO Cooling" modes, and "Heat" includes "AUTO Heating" mode.
The screen to set the selected item will appear.

Navigating through the screens
- To go back to the Main menu .......... MENU button
- To return to the previous screen ...... RETURN button

The above Timer or Preset temperature settings will not be effective when the Temp. range is restricted and when the system is centrally controlled (when the Temp. range setting from local controller is prohibited). When the system is centrally controlled (when Timer operation from local remote controller is prohibited), only the Timer setting will be ineffective.

Example: Lower the Set temp. to 24ºC (75ºF). 60 minutes later, the Set temp. will be back to 28ºC (83ºF).

The Set temp. is changed from 28ºC (83ºF) to 24ºC (75ºF) by a user.

60 minutes later, the Set temp. returns to 28ºC (83ºF) automatically.
Setting the energy-saving operation schedule

Button operation

1. Bring up the "Energy saving" screen. (Refer to page 38.)
   Move the cursor to the "Schedule," and press the SELECT button.

2. The screen to see the schedule will appear.
   Press the F1 or F2 button to see the settings for each day of the week.
   Press the SELECT button to go to the setting screen.

3. The screen to enable (Yes)/disable (No) the energy-saving operation schedule will appear.
   Select "No" or "Yes" with the F3 or F4 button.
   Press the SELECT button to go to the setting change/day of the week selection screen.
Energy saving

The setting change/day of the week selection screen will appear.
Up to four operation patterns can be set for each day.
Move the cursor to the desired day of the week with the \[F1\] or \[F2\] button, and press the \[F3\] button to select it. (Multiple days can be selected.)
Press the \[SELECT\] button to go to the pattern setting screen.

The pattern setting screen will appear.
Press the \[F1\] button to move the cursor to the desired pattern number.
Move the cursor to the desired item with the \[F2\] button out of the start time, stop time, and energy-saving rate (arranged in this order from the left).
Change the settings with the \[F3\] or \[F4\] button.
• Start/Stop time: settable in 5-minute increments
  * Press and hold the button to rapidly advance the numbers.
• Energy-saving rate: The setting range is 0% and 50 to 90% in 10% increments.
Press the \[SELECT\] button to save the settings.
A confirmation screen will appear.

The lower the value, the greater the energy-saving effect.

Controller operation-Function settings

Night setback

Function description

This control starts heating operation when the control object group is stopped and the room temperature drops below the preset lower limit temperature. Also, this control starts cooling operation when the control object group is stopped and the room temperature rises above the preset upper limit temperature.

The Night setback function is not available if the operation and the temperature setting are performed from the remote controller.

If the room temperature is measured by the air-conditioner’s suction temperature sensor, the accurate temperature may not be obtained when the air-conditioner is inactive or when the air is not clean. In this case, switch the sensor to a remote sensor (PAC-SE40TSA/PAC-SE41TS-E) or a remote control sensor.

Button operation

1. Select "Night setback" from the Main menu (refer to page 20), and press the SELECT button.

2. The current settings will appear.

Press the SELECT button to go to the setting screen.
Move the cursor to the desired item with the \[F1\] or \[F2\] button out of Night setback No (disable)/Yes (enable), Temp. range, Start time, or Stop time.

Change the settings with the \[F3\] or \[F4\] button.

- **Temp. range**: The lower limit temperature (for heating operation) and the upper limit temperature (for cooling operation) can be set. The temperature difference between the lower and upper limits must be 4ºC (8ºF) or more. The settable temperature range varies depending on the connected indoor units.

- **Start/Stop time**: settable in 5-minute increments
  * Press and hold the button to rapidly advance the numbers.

Press the **SELECT** button to save the settings. A confirmation screen will appear.

### Navigating through the screens

- To go back to the Main menu .......... **MENU** button
- To return to the previous screen ...... **RETURN** button

Manual vane angle

Button operation

1. Select "Maintenance" from the Main menu (refer to page 20), and press the SELECT button.

2. Select "Manual vane angle" with the F1 or F2 button, and press the SELECT button.

3. Move the cursor to "Ref. address" or "Unit No." with the F1 button to select. Select the refrigerant address and the unit number for the units to whose vanes are to be fixed, with the F2 or F3 button, and press the SELECT button.
   - Ref. address: Refrigerant address
   - Unit No.: 1, 2, 3, 4

Press the F4 button to confirm the unit.

The screen at left shows a sample display on Mr. Slim. On City Multi units, "M-NET address," is displayed instead of "Ref. address", and the "Unit No." will not be displayed.
The current vane setting will appear.

Select the desired outlets from 1 through 4 with the \[F1\] or \[F2\] button.

- Outlet: "1," "2," "3," "4," and "1, 2, 3, 4, (all outlets)"

Press the \[F3\] or \[F4\] button to go through the option in the order of "No setting (reset)," "Step 1," "Step 2," "Step 3," "Step 4," and "Step 5."

Select the desired setting.

Press the \[SELECT\] button to save the settings. A screen will appear that indicates the setting information is being transmitted. The setting changes will be made to the selected outlet.

The screen will automatically return to the one shown above (step 4) when the transmission is completed.

Make the settings for other outlets, following the same procedures.

If all outlets are selected, \[\] will be displayed the next time the unit goes into operation.

Function setting (City Multi)

Function description

Make the indoor units' function settings from the remote controller as necessary.

- The following settings should be made only for City Multi units and as necessary.
- Refer to the Installation Manual for how to make the settings for Mr. Slim units.
- Refer to the indoor unit Installation Manual for information about the factory settings of indoor units, function setting numbers, and setting values.
- When changing the indoor units' function settings, record all the changes made to keep track of the settings.

Button operation

1. Select Service on the Main menu (see page 20), and press the SELECT button.

2. Select Function Setting on the Service Menu screen, and press the SELECT button.
To check the current settings of a given unit, enter the setting for its M-NET address and function setting number, select Conf for the Function, and press the SELECT button.

A screen will appear that indicates that the settings are being searched for. When the search is done, the current settings will appear.

The Function Setting screen will appear. Press the F1 or F2 button to move the cursor to one of the following: M-NET address, function setting number, or setting value. Then, press the F3 or F4 button to change the settings to the desired settings.

Once the settings have been completed, press the SELECT button.

A screen will appear that indicates that the settings information is being sent.

To check the current settings of a given unit, enter the setting for its M-NET address and function setting number, select Conf for the Function, and press the SELECT button.

A screen will appear that indicates that the settings are being searched for. When the search is done, the current settings will appear.

When the settings information has been sent, a screen will appear that indicates its completion.

To make additional settings, press the RETURN button to return to the screen shown in Step 3 above. Set the function numbers for other indoor units by following the same steps.

- **Δ1**: This function is enabled after completing the high power operation because the high power operation has the higher priority.
- **Δ2**: This function cannot be operated if some operation is locked.
- **Δ3**: Night setback function cannot be used when the unit is in operation by On/Off timer setting.
- **Δ4**: Auto-off function cannot be used for Night setback operation.
- **Δ5**: Night setback function cannot be used when the unit is in operation by Weekly timer setting.
- **Δ6**: Temperature range setting cannot be used for Night setback operation.
- **Δ7**: Auto return function cannot be used for Night setback operation.

- **X**: Weekly timer setting is not effective because On/Off timer has the higher priority.
- **X**: Auto return function cannot be used because Temperature range setting has the higher priority.
This product is designed and intended for use in the residential, commercial, and light-industrial environment.

The product at hand is based on the following EU regulations:
• Low Voltage Directive 2006/95/EC
• Electromagnetic Compatibility Directive 2004/108/EC
